

# STEM Girls Application Form

To become a proud STEM Girl, fill out this form, with an attached **DRAWN** design of an invention you think the world would benefit from. For this hypothetical invention, you **MUST** only use materials and tools that you would have access to in the real world: for example, wood is a good material to use, but Moon rock is not. Also, remember that the physical universe has its limits. Be creative, but not unrealistic. Submit the drawing to Mrs Fergesen along with one paragraph explaining what your invention is made out of and how it would help people.

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Grade: \_\_\_\_\_ HR Teacher: \_\_\_\_\_

Applications will be judged for creativity, problem-solving skills, and passion for science, technology, engineering, and math.

**DUE DATE: November 24th, 2015**

Permission slips will be distributed once you are accepted.
